Contemporary Collection

The Altus Contemporary Collection spans the colour spectrum from subtle neutral tones that blend naturally with New Zealand's environment, to bold dramatic colours that express individuality; perfect for city style.

The range caters to traditional homes as easily as modern trends in building design.

Urban Collection

These colours are a selection of the latest innovations in powder coating finishes.

Created to meet new architectural trends, these shades add a new aesthetic dimension to aluminium joinery with their pearlescent finishes.

Brights

The future is looking bright.

The Interpon® D1010 Premium 'Brights' powder coating range offers ultra durability and guaranteed performance, providing enhanced weather protection for your investments. The perfect choice for where long term optimal architectural, aesthetic, performance is required.

Why not colour co-ordinate?

Consider enhancing your colour selection with colour co-ordinated hardware. We can help you create continuity and style with a range of options available for most colours.

Please consult your fabricator for further details.

Textura®

Interpon® Textura® is the ideal powder coating finish for applications where reduction in marring is critical.

The 'anti-mar' finish and advanced powder technology combine to protect the surface from abrasions.

- Mar reduction technology for use in high-wear areas.
- Reduction in potential transport damage due to highly durable surface.
- Textured pattern hides irregularities in substrates.
- D1010 Premium Residential.
- Environmental and performance benefits of powder coating.

Enhance your home

The Altus Windows collection of inspiring colours has been created especially for powder coated aluminium joinery. With colours that reflect modern design trends, the range provides you with the flexibility to either complement or enhance the individual style of your home.

Your perfect colour solution

From the pureness of snow-driven whites to soft rich creams, dramatic reds and soothing blues, there's a colour just right for you and your home. Our impressive range of permanent colours makes the important decision of colour selection easy and failsafe. You'll know you've made the perfect choice.

Seamless colour transition

Complement your choice of colours on windows and doors to any other colour you want. You may follow the theme that has been applied to the exterior of your house or allow the interior colours to take the lead. Match the roof, make a feature of special areas, blend into the natural surroundings, stand out from the crowd... the decision is yours.

Long lasting colours

When you are choosing your colour it is important to remember that different colours and finishes will perform differently depending on the aspect and environment. You may want to consider, for example, lighter colours for locations exposed to high UV levels to get the best performance from your powder coated Altus joinery.

Why powder coating?

Aluminium is an excellent material for use in joinery and construction.

But, while it is a naturally resilient surface, it still needs some protection from the elements.

There are several ways to protect architectural aluminium such as anodising and powder coating. Choosing a powder coated aluminium finish will give your project both a stylish and durable look.

A powder coat finish is also safe for the environment as well as being safe for those involved in its application. The application process is free of solvents and other chemicals.

Care and maintenance

Powder coated joinery

Like any other painted surface, powder coated aluminium performs at its best when it is properly cared for.

Keeping the surface free from pollutants and environmental contaminants will give you the maximum benefit and long lasting performance from your coated surface. This is especially true where the surface is in a protected area that doesn't benefit from the natural cleaning properties of rainwater.

In normal urban environments, a gentle clean with a soft brush and mild detergent followed by a fresh water rinse every six months will keep your coating looking great for years. In areas of high pollution, such as industrial areas, geothermal areas or coastal environments, cleaning should occur every three months. In particularly hazardous locations such as beachfronts, severe marine environments or areas of high industrial pollution, cleaning on a monthly basis is recommended.

It is important to note that harsh chemicals and solvents can be harmful to a powder coated surface and their use is not recommended.

Quality assurance and confidence

The Interpon® D1010 Premium colours in this collection, manufactured by Akzo Nobel – the world leader in powder coatings – offer superior protection for your architectural aluminium.

Drawing on over 30 years experience in powder coating technology, Akzo Nobel have used their expertise to develop a finish that is ideally suited to the local conditions found in New Zealand. The Interpon D1010 Premium range provides a durable, resilient colour finish to your Altus joinery.

Akzo Nobel's Interpon D1010 Premium powder coatings are applied by Altus and supplied by Altus. They are applied and tested to perform according to internationally recognised specifications, including AS3715 and WANZ Endurocolour.

Altus NZ Limited are an Approved Applicator.

Warranty

Interpon D1010 Premium powder coating, used exclusively for the Altus inspired colour collection, is one of the leading powder coatings available.

It produces a technically and visually unsurpassed powder coated finish for your aluminium joinery. The Interpon D1010 Premium range offers the added confidence of 15 years residential and *15/10 year commercial product performance warranties. Conditions do apply so please contact Altus for details. The Interpon D1010 Premium warranty covers residential and commercial constructions.

*15/10 – 15 year film integrity warranty and 10 year colour warranty.

All products supplied and technical advice given are subject to the standard terms of sale of Altus.

Typical end uses for Altus products are displayed in this publication using actual projects and representative images.
